Analysis results refer only to analysed samples. The test results shall not be reproduced except in full without written permission of "Eurofins Labtarna Lietuva", UAB. The client has the right to complain within 14 days from receipt of the analysis report. (A) – accredited method. (N) – not accredited method. (S) – analysis performed by subcontractors. DMB – dry matter basis. < – concentration below the limit of quantification (LOQ). Expanded measurement uncertainty expressed as standard uncertainty multiplied by the coverage factor $k = 2$, representing 95% confidence level. Combined standard uncertainty for microbiology analyzes has been taken as reproducibility

standard deviation. The contributions of sampling on measurement uncertainty are not considered. Information provided by the Customer are indicated at the following locations of analysis report: Customer; Sampling date; Sampled by; Testing object.
